

Delivering unique health insights through the power of genomic testing.

The Health Alliance is a partnership program that delivers clinical services and helps medical providers navigate the complexities of precision medicine.

Physicians will receive:

- ✓ Access to CAP/CLIA certified laboratory tests
- ✓ Clinical decision support and consulting services
- ✓ Educational sessions for you and your patients
- ✓ A HIPAA-compliant portal, the Genome Gateway, that doesn't just deliver test results but engages and educates patients about their healthcare

Our team of experienced clinical lab and diagnostic professionals, genetic counselors and knowledgeable genomic educators ensure both physicians and patients understand all aspects of genomic test and or screening options, results and actionable next steps.

The non-profit Health Alliance uses:

- Evidence-based resources
- Educational materials for your patients
- Access to clinical decision support from experts in the field of genomic medicine

The Health Alliance is here to help with:

- Patient diagnostic testing for genetic disorders for earlier risk detection and prediction of disease
- Pharmacogenetic testing to optimize medication regimens and save physicians time with fewer call backs from patients with prescription issues 
- Screening tests for heritable cancers, cardiomyopathies, and other diseases for better health decisions and actionable results

As genetic data becomes more integrated into health care decision making, you and your patients need a trusted partner to help guide your patients through the complexities of their genetic health.

Let the Health Alliance be your patients' guide to better health.
